

Real Producer G2 Streaming Video—Make it Yourself

Ran across a very handy tool for using in a distance learning class. It works!

Here are the instructions for installing Real Producer on your Computer. Many of you have probably used Real Player to get streaming audio or video. Real Producer is made by the same company--it's free. This will allow you to send an audio file (you speaking) to anyone, or add a voice clip onto a web page. Have fun.

- 1. Go to [Http://www.real.com](http://www.real.com)**
- 2. Select "Products" at the top menu bar**
- 3. Select "Tools" at the top right**
- 4. Select "Real Producer G2" in the second line of the "new" box**
- 5. Fill in the form and select "Download" Now**
- 6. Select one of the San Francisco download sites and save it to your desktop**
- 7. Double-click the downloaded file on your desktop and let it go through the installation**
- 8. When it is done, it will open up several dialog boxes to enable you to record right then.**
- 9. Select "Record from Media Device" and then "OK"**
- 10. De-select "capture video" so you only get Audio, and then "Next"**
- 11. Give it a title and an author, then "Next"**
- 12. Select "Multi-rate sure stream," the default, then "Next"**
- 13. Select "28K Modem" then "Next"**
- 14. Select "Voice only" then "Next"**
- 15. Use "Save As" to select where you want to save it.**
- 16. Select "Finish"**
- 17. Select "Start" in the lower left corner and start recording into your mic....you will see audio levels showing that something is happening.**
- 18. When you are done, select "Stop" in the lower left. (There are also start and stop controls in the pull down menu at the top)**
- 19. Close the Janus stuff and ignore it.**
- 20. find the clip you made and "Run" it. It is assumed that you will have Real Player all ready installed on your computer. The clips are run through Real Player.**
- 21. Assuming it all works, attach the file to an email and mail to?**
